Subject: January 17 JLI DRB

Hans,

Happy New Year!

As a reminder, the JLI Design Review Board is scheduled for 1/17/03. We are currently putting the agenda together and I wanted to check with you on items for review.

Items include:

- Final Biomarker reductions for CO, Acrolein, NNK
- Comparison of data from the long term study (3 month interim results) and the clinical study
- Comparisons of menthol and regular from the clinical studies (any indications that there is a difference)

Who will present and an estimate of time needed?

Thanks
